

Friendship bracelet with arrows

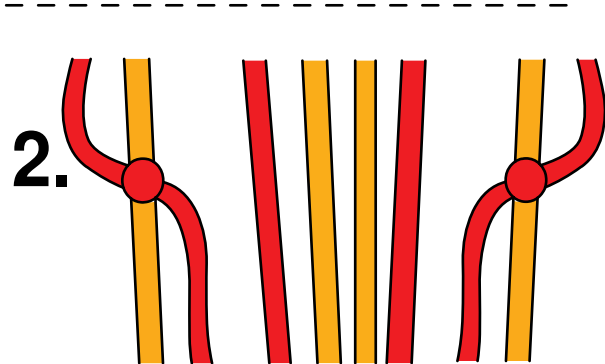

By Stefan Hedman
steffe.se/friendshipbracelets

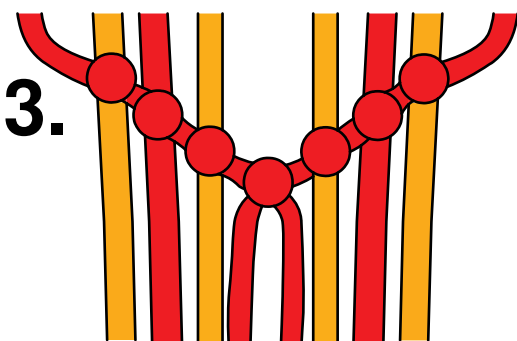

To make this bracelet, you will need yarn or threads in different colours. In this example I've used 8 threads. The length should be about 50 cm when you start to tie. To the right you see a solution for starting.

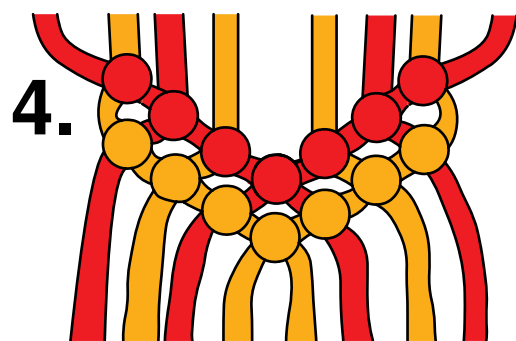

1. Start with the outer threads and make knots towards the middle as the picture shows.

2. If you've done it right, it will look about like this.

3. Continue to make knots towards the middle, using the same threads. When they meet, make either a left- or a right-hand knot.

4. Repeat steps 1 to 3 until the bracelet is long enough.
