

Striped bracelet

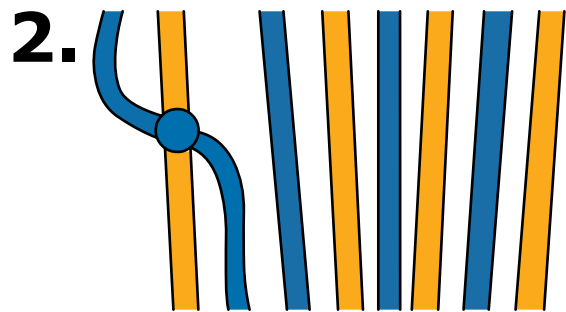

By Stefan Hedman
steffe.se/friendshipbracelets

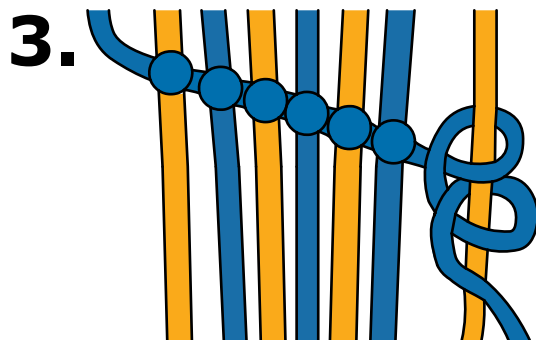

To make this bracelet, you will need yarn or threads in different colours. In this example I've used 8 threads. The length should be about 50 cm when you start to tie. To the right you see a solution for starting.

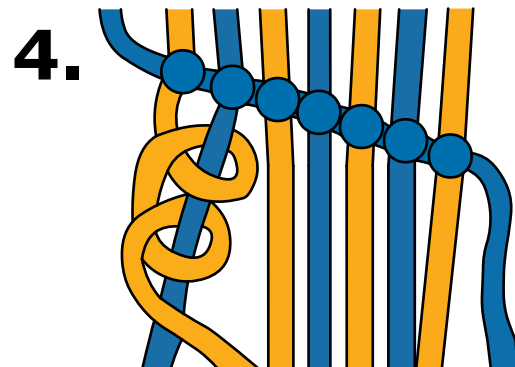

Start with the thread on the left. Make a right-hand knot as the picture shows, and tighten it.

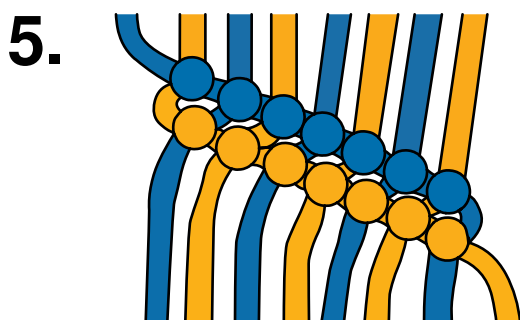

If you've done it right, it will look like this.

Continue to make right-hand knots with the same thread on the next thread in line. Do so on every thread until you've made one row.

Now you take the thread out on the left again, and do the exact same thing as in steps 1 to 3.

After two rows it looks like this. Continue in the same way until the bracelet is long enough.
